AGM Highlights

The Canadian Brown Swiss & Braunvieh Association held its Annual General Meeting virtually through TEAMS on Tuesday, March 21, 2023. The meeting was called to order at 11:06 a.m. EST with 18 members attending. The business part of the meeting was chaired by President Dave Rousseau. The Annual Report is on the website: www.browncow.ca.

We honoured 2022 Master Breeder, Prinsville Dairy Farms, Prinzen Family, Bloomfield, Ontario. Read more about this farm on the next page.

There was one resolution brought forward for the meeting. The resolution touched on the off-colour white spots and a decision was made to implement the reporting of such markings. The second half of the by-laws from last year were reviewed with 21 by-law amendments. Those too can be found on the website: www.browncow.ca.

Following the meeting, the Board of Directors elected their president and vice-president of the Canadian Brown Swiss & Braunvieh Association. Dave Rousseau and Stefan Gubelmann will keep their current positions. A special thanks to Dave and Stefan, and all Board members for their time and commitment to the Association.

2022

Master Breeder

Prinsville Dairy Farms

**PRINZEN FAMILY
BLOOMFIELD, ON**

Prinsville Dairy farms is a third-generation dairy farm located in the village of Bloomfield in Prince Edward County. Bill Prinzen Sr. and three of his four sons started the farm in 1972. David joined the family dairy farm in 1997 with his dad Bernard at the current farm which was divided in 2003.

Currently, we are milking 100 cows in a tie stall using an automatic take off and easy track milking system. In our herd you will find Holstein, Milking Shorthorn, Brown Swiss and a few Jerseys.

Classification and milk testing are done regularly to keep up with our breeding strategy, which is nice to have and easy to work with. It's pleasing to look at an animal with ease of milk production and longevity. The Brown Swiss breed was introduced in the early 1990's by using a bull from Primeview Farms, owned by family member Andy Prinzen.

Adding to our Brown Swiss herd in 2006 after a herd dispersal at Primeview was Prinsville Cartoon Sapphire, who was a major contributor in high quality offspring in the herd after doing several flushes, in which there are 10 daughters. Two of these daughters are sired by Brookings, both scored excellent on the same day after their third calf.

Brown Swiss have been shown successfully through the years as 4-H calves. Being on a family dairy farm allows for the 4th and 5th generations to help and hopefully take over the family farm. Farming is a lifestyle not just a job. Working everyday with animals and constantly working to improve operations and cow type is what keeps us going.

Family, faith and farming go hand in hand at Prinsville Dairy Farms and it is a real honour to receive The Master Breeder award for 2022.

Off-Coloured Spots

You may have heard some talk lately surrounding Off-Colour spots (OCS) in the Brown Swiss and Braunvieh breeds. At the Association's AGM in March, the Board asked the membership to approve wording in the by-laws. Members at both the Association and at Lactanet voted on resolutions received regarding the OCS in Brown Swiss and Braunvieh cattle.

So... what is this Off-Colour Spot? The OCS is a prominent white marking on a Brown Swiss or Braunvieh animal such as the ones shown on the pictures below. This particular heifer has a white marking on both her head and on her belly extending quite far up its side. We are not talking so much about specific colour patterns such as the lineback or belted markings which were referenced recently in a couple of different dairy magazines.

As explained in the bylaws of the Brown Swiss and Braunvieh Association: "distinguishing breed characteristics include a white ring around the muzzle, hooves that are entirely black, and the desired colour which may vary from light brown to very dark brown. Any animal with any white or off-colour markings above the underside of LA CLOCHE or having a white core in the switch does not meet colour standards and shall be designated when registered and his/her papers predominately marked "Off Colour Spot" (OCS)".

Traditionally, white markings were not common in the Brown Swiss and Braunvieh breed and were usually seen in animals whose pedigree could be traced back to other breeds or unknown pedigree. These animals were not purebreds but were in the process of upgrading their purity. A female who was eligible for purebred status based on the number of generations on the pedigree that have been graded up, would be disqualified from purebred status if she had an OCS and males with OCS were not eligible for registration.

In recent years however, there has been an increase in OCS coming from animals whose pedigree is already 100% pure. This is in part because several bulls which have been used in the past and today, tend to produce progeny with a white spot. E.g. Scherma Blooming River BSCHM120094290070 and Jolahofs Superstar Dreamer ET BSCHM120069740229.

In response to this, the Board has confirmed that the intent of the by-laws is still for graded up stock. The producer will not be penalized for using purebred bulls which tend to throw calves with white spots. Therefore, any resulting progeny having white spots, will not be downgraded. However, the board recognizes that it is important to keep track of information like the OCS. The colour of the Brown Swiss cow is an important distinguishing breed characteristic and so it is important for the Association to be aware of animals that have a spot for statistics and informational purposes.

The application for registration as shown below has a section where the breeder can indicate whether an animal has an OCS. Please do remember to fill out this information when submitting your registration. The application for registration has both a place for Off-Colour spots and to indicate whether your animal has distinguishing breed characteristics. If your animal has an OCS, but is otherwise has a colour typical of the Brown Swiss breed, you can indicate it there. If your animal has irregular colours or markings such as those you would find on a cross-bred (i.e. very dark brown or black with white feet and legs, etc.), you would indicate "no" under the distinguishing breed characteristics. If you submit your registrations through a milk recording service, please make sure that your rep reports these spots when registering, they could add to the comment field.

Many Brown Swiss animals are born with a light coat which becomes darker as they age, and so the spots are not always apparent right at birth. If a spot appears after which time as the animal is registered, please call the Association at 1-519-756-8300 ext. 277 to report it and have it added to the animal's record.

Message From Our President

The beginning of summer brings with it various provincial activities, but especially the start of animal judging for 4-H Clubs across the country. These judging events enable breeders to compare themselves with each other, while at the same time providing a superb showcase for our breed. It's important to remind all young Brown Swiss exhibitors to take the time to photograph their heifers this summer, in order to enter our All-Canadian Contest in the 4-H section, and compete against other young people at the national level.

The past financial year once again ended on a positive note, enabling us to reimburse certain amounts to Provincial Clubs who have requested it, and thereby help to improving their operating capital. We remain vigilant with regard to our expenses, which explains the new approach we used at our last virtual Annual General Meeting, where I myself took turns to translate rather than hiring a team, given that interpretation rates have increased significantly this year.

It's also interesting to see that our Board of Directors is in the process of filling all its positions, with the arrival of Ashley last year in the province of British Columbia and now Dana Vos in Saskatchewan. We have been invited by the province of Alberta, which will be hosting the next Annual General Meeting.

The reopening of the Canadian border to semen imports is also excellent news for all breeders wishing to introduce new genetics, although supply is limited due to the high

number of bulls infected by the Schmallenberg virus. Having the possibility of using new bulls is very interesting. It's important to note that there are several excellent sources of Canadian genetics at various centres, and that we can be proud of the work accomplished by our breeders, who really distinguish themselves.

Finally, I'd like to mention the recent success of the "Calves For A Cause" Sale held at the Canadian Dairy Expo. Two Ontario breeders, Gubelman Farm and John and Shirley Dortmans, each had a heifer in consignment at the multi-breed sale. The event provided excellent visibility for the breed, as well as enabling a donation to be made, helping to improve the Pediatric Intensive Care Unit and Child Life Services at the London Health Sciences Centre, in Ontario.

– Dave Rousseau, President

Greetings To Everyone from Alberta

Hello Everyone,

In my last article for the 2022 Winter Issue, I had written that we decided not to attend Farmfair International, after 25 years of doing so. However, with late entries still being a possibility till November 1st, we conceded to the 4-H kids wishes to have us go and take them along. So, on Halloween night, I submitted entries to the heifer classes for four of the 4-H kids and also entered a yearling bull and our 7-year old cow with a bull calf at the side to be shown in the "All Other Breeds Show", as we had done in previous years. I thought that I would regret this last minute change of mind.

But all went well. The 4-Hers in attendance did their absolute best to be of assistance in preparing for the show, keeping the stalls clean, the animals fed and watered, walking them out to their tie-outs every night, and back to the barns in the mornings. We had six very early mornings and six very late nights. The 4-Hers' parents and siblings also participated in much of the work and one crew slept at our house and so it was a little chaotic at times, but we all had fun and enjoyed the challenges.

So my husband was wrong - I sure didn't regret it (...and neither did he). It was good to see all those kids caring for their animals and showing them with pride. Riley Jans made 2nd with his heifer. Our cow/calf made Grand Champion Female and the bull did Grand Champion Male. So we had a chance to go with both of them to the Supreme, representing the "All Other Breeds".

With having Mira Schamber and Riley Jans showing their heifers with our bulls to make up the Breeder's Herd, we placed 2nd out of three and also got the Premier Exhibitor Award.

After six days, everyone was happy to get home. Showing is definitely hard work and long days. In December, we ventured to one more show though. We took our two bulls to a two-day pen show in Medicine Hat, where we met up with the 4-Hers from Saskatchewan. Those kids have endless energy and Taylor Jans, who wasn't at first going to have a 4-H heifer, had gotten so involved with showing and all, that he built an attractive booth display complete with table and storage cabinet. Again, everyone had a good time, but the trip home in blowing snow was tiresome.

This spring, we attended the 4-H shows at Holden and Wetaskiwin. Shaely Junck and Mira Schamber both did a very nice job with getting their heifers ready and the animals behaved well and Mira made 2nd in showmanship. Shaely's Judge commented on the great structure and feet of the Braunvieh, and said by that he should place her first, but the other heifers were bigger than hers. Her heifer was raised on hay with just a little treat of grain - no fancy 4-H

ration. We find this good, because heifers should not look like butterballs. At the end of the day, the main thing is that both girls were very happy with their projects.

Another Alberta 4-H Club participant is 11-year old Jacob Schlegel, who showed a heifer given to him by his grandparents Gody and Ruth Schlegel.

Then there are the four 4-Hers from Saskatchewan. These siblings participated in many events and, at the Maple Creek Multi 4-H Club Achievement Day, 7-year old Harlie Jans won the Reserve Champion Heifer title with Swiss Tradition Karralina.

In B.C., Lindsey Houchen won the Grand Champion title with her 4-H project Swiss Tradition Daisy as a yearling in 2021. Then, in 2022, Daisy with her first calf at side, again earned the Grand Champion title.

So, in the future, look out for all these excellent kids working hard at showcasing their Original Braunvieh cattle in 4-H Clubs and other cattle shows. It takes a lot of determination and courage to show a different breed against the well-known popular ones, but it is obvious, these kids love their Braunvieh. Great job

On May 17th, we attended the funeral of George Ulrich, who had passed away peacefully on May 9, 2023, at the age of 87 years. Our sincerest condolences go out to his family. George was a life-long breeder of Original Braunvieh and was highly respected for his knowledge and breeding expertise of these cattle. He had made many trips to Switzerland, South Africa, Mexico and Brazil, because he received invitations from people in the Braunvieh business from those places. George lived a good life and did a great job preserving the Original Braunvieh. The full story on George is contained in the attached obituary: <https://necrocanada.com/obituaries-2023/ulrich-jurg-george-2023/>

And those are the news from Alberta so far this year.

Best regards to all of you

Sincerely,
Verena Peden,
Secretary-Manager, Alberta Braunvieh Association

News from Manitoba

Greetings from Manitoba! We are enjoying a beautiful spring, watching everything come back to life after winter's rest, and ushering in a busy season on the farm.

Our provincial association has had no activity since our last report, so I thought I would share a bit of what has been happening on our farm - Sight Hill Farm, near Austin, Manitoba.

We have always enjoyed giving tours on our farm, and have had several opportunities over the last year, including individual families, and a small group from a youth rehab facility. Our most recent visitors were the Grades 4 - 6 children from the Austin Elementary School.

Their visit included a barn tour, a time to run around the farm and see the outside animals, and a time of

learning about the dairy industry and, more specifically, about our Brown Swiss cows. They shook a jar of cream until it became butter, and then sampled the butter with some crackers. We also provided them with dairy snacks of ice cream, cheese, and milk (white and chocolate). The children and teachers had a wonderful time! Being able to get close to the animals was a real highlight for them.

We are looking forward to having the Kindergarten class come for a tour in June! It is always a pleasure to educate and to promote awareness of our industry and our breed.

Linda Doerksen, Secretary Treasurer,
The Manitoba Brown Swiss Association

News from Ontario

Greetings to our fellow Brown Swiss breeders,

This spring the Ontario Brown Swiss Association participated in the fund-raising event, Calves For A Cause.

Consignments from Canada's top herds were auctioned at CDX in Stratford. The Association donated 100% of the proceeds of the sale of the calf and 100% of the commission to the Neonatal Intensive Care Unit at Children's Hospital, London Health Services Centre. A full-age senior calf was purchased from Gubelmann Brown Swiss Ltd. It was an exciting night, and very professionally run by the sales staff. There was a huge crowd, and the two Brown Swiss animals created a lot of interest. The Gubelmann calf was bought for \$9700.00 by Holstein Canada, was then re-donated and resold for \$4800.00 to Chris and Brianne Brown.

Thank you to everyone who participated in this worthwhile cause.

There will be a Brown Swiss Show at Hanover on Saturday, August 12 and a show at Kincardine on Saturday, September 2, 2023. As always we hope for as many exhibitors as possible.

Wishing everyone a healthy and prosperous summer.

Tracy Reid, Secretary Treasurer
Ontario Brown Swiss Association

News from Quebec

Hello everyone,

The busy season is already well underway, and we hope that your crops will live up to your expectations.

The Brown Swiss Club of Quebec continues its work, both in the field and internally. In fact, we are currently working on updating our Strategic Plan. A sub-committee has been created in order to come up with the main themes, which will then be submitted in the form of a survey to members. Once the responses have been received, the Board will meet for the final version.

The Brown Swiss Cup will be back again this year and will take place during the week of August 21, 2023. This year's edition is somewhat ahead of schedule compared with previous years. The reason is quite simple: the availability of our guest judge. We are very pleased that Mr. Jake Hushon, of New Generation, has accepted our invitation. You will soon have all the information you need to register your beautiful Brown Swiss.

Do you have one or more cows that stand out in your herd for their offspring? They may be eligible for Passion Brown Swiss, a contest in which members vote to crown the winning cow. For more information, do not hesitate to contact us: sbilodeau@brownswissquebec.com.

As most of you already know, since last April, Swissgenetics semen is available again in Canada. For your next order, which will be in August, talk to your CIAQ representative, or call our technical advisor, Serge Bilodeau, who will guide you through the best options for you.

If you take nice pictures of your Brown Swiss, don't hesitate to share them on Facebook or other social networks. There can never be enough of them, and they could also be part of the 2024 calendar. The Canadian Brown Swiss Association will be happy to help you with any questions you may have regarding the 2024 calendar.

In closing, I wish you all a great summer. Try to get some rest and spend time with your family despite the heavy workload that is happening for farmers.

I would like to take this opportunity to thank the members of the Quebec Board of Directors for their passion and dedication, which I appreciate very much.

Some forty people attended the Annual General Meeting of The Brown Swiss du Québec Club on December 1 at the Érablière du Cap de Saint-Nicolas.

The AGM was preceded by the unveiling of the top producers for 2020-2021 and the results of the Brown Swiss Cup 2022.

The Association's financial year ended with a loss of nearly \$7,500. Four positions were up for election this year. Ms. Cynthia Fillion, territory number 2, Mr. Sylvain Boulanger, territory number 4, Ms. Isabelle Dupré, territory number 6, and Ms. Ariane Maltais, relief position, were re-elected for another 2-year term.

At the break, the Club's Board of Directors met to elect officers for the new year. They re-elected Mr. Dave Labrie as President, Ms. Josée Charron as 1st Vice-President and Mr. Étienne Boivin-Côté as 2nd Vice-President.

Brown Swiss Cup: – 4th Edition

For the 4th edition, the Brown Swiss Cup was a success with 48 cows signed up!

1ST LACTATION

1. BROWN HEAVEN F&F BERRY * - Ferme Brown Heaven
2. MILEC ALMANAC ARIELLE - Ferme MCF Leclerc inc.
3. LENTREROCHÉ BIG STAR FAITH - Ferme Vannod et Associes Enrg
4. CHARLUSON PASSAT BRITANNIE - Ferme Charluson inc.
5. ISIDORE HURAY DIANA - Ferme Lehmann

* Best owned-bred in class

2ND LACTATION

1. TOP ACRES CADE WIZBEE ETV - S Boulanger, C Dulac, F Huppin & F Beauvair
2. MEADOW HILL G - S Boulanger, C Dulac & Ferme Cabouron
3. RENCIE PASSAT SUIRIPAS * - Ferme Rencie inc.
4. DU COSMOS ZOE DYNAMITE - S Boulanger & C Dulac
5. GRANMONT DYNAMITE SALTY - Ferme Domaine de la Rivière inc.

* Best owned-bred in class

BROWN HEAVEN WF RAISINBRAN ** - Ferme Brown Heaven

** Top producing cow in class

3RD LACTATION

1. DES AULNETS BIG STAR HOLY * - Ferme des Aulnets (1994) inc.
2. GOULAISE CADENCE DECADENCE - Ferme Goulaise inc.

3. GOULAISE FALK EVENKA - Ariane Maltais & Ferme Beauvair inc.

4. MILEC BIVER ZELDA - Ferme MCF Leclerc inc.

5. SWISSLANE BROOKINGS KIND - Ferme Melicska 1997 inc.

* Best owned-bred in class

SHWEIZER ASSAY POUFFA ** - La Ferme Hans enr

** Top producing cow in class

4TH LACTATION AND +

1. BROWN HEAVEN T JEAVERISSA-ET * et ** - Ferme Brown Heaven

2. BATESDALE THUNDER VERA - Ferme Charluson inc.

3. GRANMONT DURHAM LEGERTE - Ferme Domaine de la Rivière inc.

4. ANFIELD C E THUNDER EMMA - Ferme Brown Heaven, F Mathys & M Muller

5. WIND MILL SVEN HOSTA 1677 - S Boulanger, C Dulac & Ferme Cabouron

* Best owned-bred in class

** Top producing cow in class

BREEDER HERDS

1. Ferme Goulaise inc.

2. Ferme Brown Heaven

3. Ferme Charluson inc.

4. Ferme MCF Leclerc inc.

5. Ferme Des Aulnets (1994) inc.

CHAMPIONSHIP

Reserve Grand Champion

BROWN HEAVEN T JEAVERISSA-ET

Ferme Brown Heaven

Grand Champion

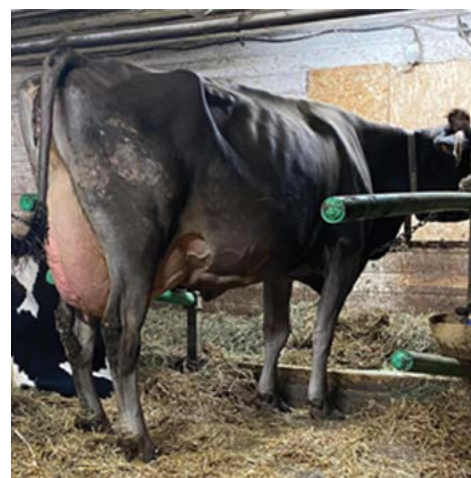

DES AULNETS BIG STAR HOLY

Ferme des Aulnets (1994) inc.

Honourable Mention

TOP ACRES CADE WIZBEE ETV

S Boulanger, C Dulac, F Huppin & F Beauvair

Thank you to our partner!

Registrar's Message

Good morning from the office in Brantford,

It was great to see many of you at the AGM in March this year. Even though we still didn't get to meet face to face this year, it was still a good meeting. A special congratulations to the new Master Breeders, the Prinzens, of Prinsville Dairy farms! Another big project at the AGM was the by-laws. I am glad (and I am sure you are too) that they have been completed and once approved by the Animal Pedigree act they will be updated. Hopefully we don't have to do something that large again for a while. Thanks for sticking with us as we went through that and congratulations on a successful day!

As of writing mid-May, we have had about 550 registrations and 410 classifications this year so far. Both registrations and classifications also seem to be up slightly compared with the same period as in 2022. This means that we continue to maintain activity and even slight increase in activity compared to last year.

There seems to be lots of momentum with 13 new members already this year spread across four different provinces.

Don't forget to submit your application for the 4-H All-Canadian Contest this year!

On a bittersweet note, this will be the last note from the Registrar written by me. I am planning to leave my position at Holstein Canada as of June 15 to go work on the farm full-time. I will have a hard time leaving behind my day-to-day contacts with you, but I also look forward to being at the farm in the barn every day. Thank you for letting me work with you for these last 4 years.

Enjoy your summer! Don't forget to take a break once in a while when things get a little crazy in the fields.

Janine, Registrar

Meet the New Team!

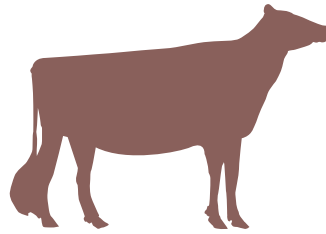

With Janine going back to the farm and leaving her Registrar role we have 2 bilingual new customer members join our team. They have been training with Janine for the last 6 weeks but are still learning and will have some questions along the way. We wish Janine well in her new adventure, thank her for dedication and sharing her expertise with our new staff. I would like to introduce to you Isabelle Passaretti and Golda-Anne Nabila. – *Linda Maibler*

Hello/ Bonjour! My name is Isabelle Passaretti and I am very excited to be a part of this wonderful team and Association. I'm looking forward to expanding my knowledge of the dairy industry and learning more about the Brown Swiss and Braunvieh breed. Most of all I'm excited to meet our members, and their cows of course!

I'm Golda-Anne, coming to the team with a lot of customer service experience. I look forward to providing excellent support to our members and bringing my skill sets to the team. Coming from a nondairy background I am learning lots and taking it one day at a time hoping to get the whole concept as soon as possible. Looking forward to working with you all and meeting the cows too. 😊

Congratulations to the **2022** **All Canadian 4-H Contest Winners**

CANADA VS US PROOF RESULTS

How Similar Are They?

ARTICLE BY: MURILO CARVALHO, HOLSTEIN CANADA EXTENSION & EDUCATION SPECIALIST

In Canada, when referencing genetic evaluations we typically look at LPI to discuss an animal's genetic merit because it is the official national index. South of the border, PPR and NM\$ are the most common among Americans, while other countries have indices that have been built to reflect their own conditions, needs and market. For example, some countries emphasize traits related to fertility because their system uses seasonal calving, while others focus more on health instead of production. Also, each country uses its reference population, the heritability of the traits in their population, and incorporates the correlations among them to calculate the indices.

With the minority of the AI companies (and bulls available) being from Canada, many of them present their proofs with American numbers. For this reason, Canadian breeders are fairly familiar with PPR and NM\$. Still, it is crucial to know the aspects that differ from the domestic proofs and how it affects your breeding decisions. In fact, we often underestimate the differences between the American and Canadian indices, which can heavily impact the genetic gain of your herd.

Related, but not the same

One can argue PPR and NM\$ are highly correlated with the Canadian LPI. Fair point because the indices do have a strong relationship. Even though there is no Pro\$ evaluations for the Brown Swiss Breed, since that index was launched for Holsteins and Jerseys, the LPI index has been tailored to mean higher profitability at the farm level. Both PPR and LPI have a similar approach - a major focus on production, along with functional conformation, health and fertility traits. Meanwhile, NM\$ is an economic index,

meaning it tries to predict the genetic potential of the animals and/or their progeny to generate profit. For that, they consider the national industry, economic and market parameters, which are significantly different between the Canada and the United States. Also, the traits included in these indices and their respective weights vary significantly. The table summarizes some relevant differences that affect how the American and Canadian indices are built.

Industry aspects	Canada	USA
Herd size	~93 cows	~300 cows
% cows on AMS	~25%	~4%
% cows on pasture	Virtually no 100% pasture system	20% entirely on pasture at some point of the year
Current milk price	~\$0.90 CAD/kg	~0.70 CAD/kg
Milk price structure	Defined and similar across the country	Varies by region (20% variations), some follow international prices
SCC limit	400,000 cells/ml	750,000 cells/ml
Dairy areas' land price	\$5,000-80,000/acre	\$3,000-15,000/acre
Location and weather	No warm dairy areas	60% of dairy areas are cooler, 40% are in a warm climate
Feed cost	~\$23 CAD/100 liters of milk	\$18 CAD/100 liters of milk
Quota	\$25-50,000/kg	No quota system

Different countries, similar focus, different goals

With the contrasts among the two countries, you can imagine the realities of the herds within very distinct – even within Canada, we find diversity among management environments. Although the overall goals are similar – more production, for example – the specific objectives change. Looking South of the border, most of Brown Swiss

herds are in the North part of the country, which is closer to the Canadian reality. Still, many herds do process their own milk, while several use Brown Swiss for crossbreeding. That creates a whole different scenario from the one seen in Canada, where there are not many crosses using Brown Swiss, and the milk price paid for the producer is established by the milk board. In addition, different regions in the US have a very distinct price structure. This variation reflects into Net Merit (NM\$) being a mix of three economic indices: Cheese Merit (CM\$), focused on component production; Fluid Merit (FM\$), focused on volume of milk; or Grazing Merit (GM\$), focused on high health and fertility, and not as much production. Indeed, for a Canadian producer, CM\$ is probably the closest we can get to the Canadian index.

Breaking down the trait differences

Within the indices, the production traits are evaluated very differently. While Canada uses production and milk quality over three lactations, US considers only the first lactation. Also, the US includes crossbreds into their production evaluation, while this doesn't happen in Canada. For functional traits, the methodology is also different – for example Canadian and American fertility indices are not the same; US mastitis resistance considers only first lactation cases, while Canada considers 3 lactations. Finally, the conformation traits also have significant differences that affect the indices, with some traits not evaluated on both sides of the border, while others have different criteria. The table summarizes these.

Trait	Canada	USA
Udder Floor, Body Condition Score	Weighted traits	Research traits (no weight)
Udder Texture, Loin Strength, Heel Depth	Weighted traits	Not evaluated
Strength and width	Evaluates Chest Width and Body Depth – both have intermediate ideals	Evaluates Strength (includes width) and Body Depth – extremely deep and wide are ideals
Udder Depth, Body Depth, Foot Angle	Ideal is intermediate	Ideal is one extreme (shallow, deep, and steep, respectively)
Rib Structure	Dairy Capacity includes rib angle, openness and spring	Dairy Form includes rib angle and openness

What does that mean in practical terms?

By now, you can imagine the indices have relevant differences. The animals that do not rank very well for traits that are evaluated differently (or not evaluated) end up falling in the index ranking. To illustrate the differences, the PPR formula has higher weight and doesn't weigh feet & legs or fat and protein deviations, while the Canadian index emphasizes deviations, as well as feet and legs, rump structure, and milking speed. In the end, those factors represent some relevant variations to the bull rankings, with some low conformation ones appearing higher in the US rankings than Canadian ones.

Take home messages

Different countries across the globe adopt specific indices that reflect the average reality of their producers, their animals, and their breeding goals. Even though most of the indices focus on general goals that are common to any country (production, fertility, longevity...), the animals have very distant rankings depending on the country. This is important to keep in mind when deciding which bulls to use and also when analyzing your own females – for example, a high NM\$ heifer may be far from the top in terms of real profitability here in Canada. Although you are still going to make gains, you could drastically boost the progress by using the evaluation designed for the Country, the cows and the reality in which you farm.

Two Years of National Traceability!

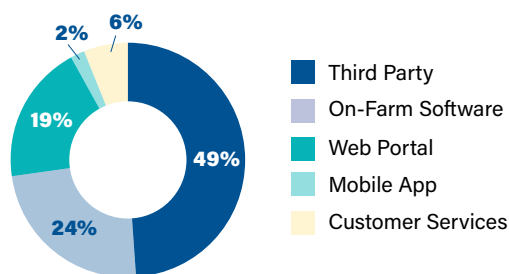

Since the launch of DairyTrace in October 2020, nearly 95% of active dairy farmers outside the province of Quebec* have activated their DairyTrace account and begun reporting their traceability events to the national database for the dairy cattle industry.

Reporting

Reporting is now easier than ever and is on the rise! Even though proAction® traceability event reporting only became mandatory in September 2021, over 1 million events were reported throughout 2021 nationally. Each event that is reported creates the timeline of an animal's movement and ensures an efficient traceability program.

2021 Events Reported by Source to SimpliTRACE & DairyTrace

Events such as births, movements, imports/exports and tag retirements can be reported via a variety of reporting options available.

Directly through DairyTrace via:

- online portal
- mobile app
- customer services

Indirectly with the

assistance of an on-farm software system or a third-party data provider.

Dairy Tags - Dual & Single

DairyTrace and proAction® encourage dual tagging as the ideal practice for identifying all animals born on dairy farms across Canada. As an allowable exception outside the province of Quebec, the white single button RFID tag was introduced by DairyTrace in 2020 as an option for identifying calves born on your farm but are destined for purposes other than dairy production.

For national dairy cattle traceability, any approved white dairy tag is highly preferred, but the use of yellow button beef tags remains an allowable option. It is expected, however, that the use of yellow button beef tags on dairy farms will be fully phased out by September 1, 2023.

Customer Services

Our two bilingual customer services teams, located in Ontario and Quebec, have been busy helping producers and stakeholders learn about traceability, set up their accounts, report events, order tags, and access their proAction® Validation reports.

Contact customer services for questions:

Support for provinces outside of Quebec:
Phone: 1 866 558-7223
Ordering tags: tags@dairytrace.ca
Traceability questions: info@dairytrace.ca

Support for Quebec:
Phone: 1-866-270-4319
Email: sac@attestra.com

* Quebec has pre-existing provincial regulations that require farmers to report on births, deaths and movement. To respect these regulations, Quebec dairy farmers must continue to report directly to Attestra using SimpliTRACE and dual tagging of all cattle is mandatory.

Base Change Summary - April 2023

Each year, the genetic base used to express genetic evaluations in Canada is updated in conjunction with the first official release. The definition of each genetic base used is therefore as follows:

Breed(s)	Traits	Genetic Base Definition Used
All	Production	Cows born during a 3-year period centred seven years ago (2015, 2016 or 2017) that have test day records in the Canadian Test Day Model genetic evaluation analysis. The same base group is also used for Pro\$.
Holstein	Conformation	Proven bulls born in the most recent complete 10-year period (2008 to 2017).
Coloured	Conformation	Proven bulls born in the most recent complete 15-year period (2003 to 2017). For Canadienne and Milking Shorthorn breeds, the base period starts with proven bulls born in 1984 and for the Guernsey breed it starts with proven bulls born in 1994.

The table below indicates the amount of base change realized in 2023 compared to 2022 for each trait and breed. For LPI, the following base adjustments reflect the change to the new scale with half the variance compared to previous years.

Base Changes for 2023 Versus 2022

	AY	BS	CN	GU	HO	JE	MS
LPI ¹	0	0	0	0	0	0	0
Milk (kg)	74	60	37	91	111	59	-12
Fat (kg)	3.6	2.8	1.0	3.1	5.1	3.4	0.3
Protein (kg)	3.1	2.4	0.9	2.4	4.5	2.5	0.0
Conformation ³	0.44	0.11	0.12	0.31	0.71	0.14	0.16
Mammary System ³	0.48	0.18	0.10	0.17	0.79	0.18	0.15
Feet & Legs ³	0.28	0.08	0.13	0.19	0.44	0.00	0.13
Dairy Strength ³	0.33	-0.16	0.06	0.27	0.19	0.08	0.20
Rump ³	0.14	0.04	-0.08	0.12	0.07	0.02	0.04
Herd Life ²	0.36	0.07	0.00	0.19	0.70	0.12	-0.08
Somatic Cell Score ²	0.12	0.02	0.07	0.27	0.75	0.22	0.40
Daughter Fertility ²	-0.07	0.11	-0.04	0.09	0.74	0.14	0.06

1 – Base change for LPI is set to zero since it is already reflected by the change in the “Constant” included in the LPI formula.

2 – Traits expressed on scale of Relative Breeding Values (RBV).

3 – The base change for Conformation traits are based on genetic evaluations calculated using daughter classifications and not composite indexes as introduced in April 2021

CONNEXION

Holstein Canada Presents

An All-Breeds Genomic Testing App

Simplify genomic testing for any breed with ConneXXion

Easily search for animals in your herd and link them to samples

Submit genomic test requests before animals are registered to speed results

Track the progress of your samples from the time you ship them, to receiving results!

Now Available

Check out the App today!
