MESSAGE FROM OUR PRESIDENT

2021 was a year of uncertainties with a slow recovery of activities and at different speeds depending on the province and the country. I was very disappointed by the lack of participation that prevented us from holding a Canadian Final at the Suprême laitier. We didn't have any official judging in Canada for the Brown Swiss breed; while this is unfortunate, it is understandable given all these uncertainties. Some could see that as a dwindling interest in the breed; however, if the trend continues, we will end the year with an increase in the number of registrations that were submitted compared to the last two years, and we already have more than 15 new members, a proof that our breed is gaining in popularity. It's now up to us to make it look good.

Again this year, Canadian genetics stood out at the World Dairy Expo, despite a decrease in the number of Canadian exhibitors. Seeing four class winners among the heifers out of Canadian sires was quite an accomplishment, particularly when two of those heifers were awarded the Junior Champion and Reserve Junior Champion rosette ribbons. Congratulations to all the participants. It is also important for you to add the Brown Swiss World Conference on your agenda, which should

be held in 2022 at the time of the World Dairy Expo.

We are also very proud to announce the creation and the addition of two new classes to the All-Canadian Contest for the 4-H: a Junior (Junior and Intermediate Calf) and a Senior Class (Senior Calf, Summer Yearling & Junior Yearling). With this addition, we intend to motivate and to honour the young people who take the time to prepare and show their heifers across the country. No fees will be charged to young people enrolling a heifer in this class.

Finally, a small glance at the production results of each class for the past year makes us realize that the genetic improvement achieved in recent years allowed our Brown Swiss cow to reach much higher levels of fat and protein produced per year. If we want our breed not to lose its identity, it will be essential to maintain the longevity of our animals and the quality of our milk. Our breed is considered to be one of the oldest dairy breeds in the world, and is increasingly able to compete with the other dairy breeds, without the slightest complex.

– Dave Rousseau

2021 ALL CANADIAN 4-H CONTEST

With no Canadian Brown Swiss and Braunvieh shows in Canada in 2021; the Association will have a 4-H only All Canadian Contest – Junior and a Senior Class for 2021. These new classes will be included in future All Canadian Contests. The class list for the 2021, 4-H contest is below and entry forms can be obtained by Phone 519-756-4720 or Email brownswiss@holstein.ca or Web www.browncow.ca.

DEADLINE FOR ENTRY IS FEBRUARY 25, 2022

Classes for the 2021 4-H contest include:

JUNIOR CLASS:

1. Junior Calf – Mar 1/21 – May 31/21
2. Intermediate Calf – Dec 1/20 – Feb 28/21

SENIOR CLASS:

3. Senior Calf – Sept 1/20 – Nov 30/20
4. Summer Yearling – June 1/20 – Aug 31/20
5. Junior Yearling – Mar 1/20 – May 31/20

NEWS FROM QUÉBEC

With the participation of about thirty people, the Annual General Meeting of the Québec Brown Swiss Club was held last December 2nd at the Cap de Saint-Nicolas Sugar Bush.

The Association ended the fiscal year with a loss of \$49.

Five seats were up for election this year. Mr. Dave Labrie, District #1, Ms. Josée Charron, District #5 and Mr. Étienne Boivin Côté, District #7, were re-elected for another two-year term. Mr. Renald Dumas, District #3, and Ms. Katherine Deschênes, District #6 (midterm) decided not to renew their mandate and were replaced by Mr. Mikhaël Daigle, District #3 and Ms. Isabelle Dupré, District #6.

During the break, the Club's Board of Directors convened to elect the executives for the coming year. They elected Mr. Dave Labrie as President, Ms. Josée Charron as 1st Vice-President, and Mr. Étienne Boivin-Côté as 2nd Vice-President.

The Club is pleased to welcome the two new directors on the Board and conveys their warm thanks to Mr. Dumas and Ms. Deschênes for their contributions to the Brown Swiss breed and their work with the Board of Directors.

Board of Directors:

Isabelle Dupré, Josée Charron (1st Vice-President), Cynthia Fillion, Étienne Boivin-Côté (2nd Vice-President), Dave Labrie (President), Mikhaël Daigle and Ariane Maltais

--	--	---

The unveiling of the 2020-2021 top producers, the winner of the 2nd edition of the Brown Swiss Passion Contest as well as the results of the 2021 Brown Swiss Cup took place before the AGM.

For this 2nd edition, the three finalists selected according to their pedigree, their life experience, their progeny and also for the crush they created were Brown Heaven Tract Sweet Dally, Hinsy Amaretto Kocktail and Milec Dally Belgazou, all exceptional cows.

With 65 cows registered, the 3rd edition of the Brown Swiss Cup was a success.

NEWS FROM QUÉBEC

The Québec members elected Brown Heaven Tract Sweet Dally, owned by Ferme Brown Heaven, as the winner of this 2nd edition.

2021 Brown Swiss Passion Contest

2021 WINNER

Brown Heaven Tract Sweet Dally

AN EXCEPTIONAL COW X2!

Proof of her consistency and her exceptional character, Sweet Dally is once again among the finalists of the Brown Swiss Passion Contest.

Born of the first calf-heifer Brown Heaven Daniel Sexy Dally, EX-92-2E – the first cow with the Brown Heaven prefix –, Sweet Dally quickly stood out by her very good conformation that earned her an Honorable Mention at the 2014 Dairy Supreme and the Reserve Junior Champion title at that same event in 2016. She was also nominated All-Canadian Junior 2-year-old, Junior 3-year-old and 5-year old.

In addition to being a very good producer with above breed average content (4.6% Fat, 3.5% Protein), Sweet Dally passed on her dairy capacity to her 3 daughters who now have an overall production of 130,000 kg of Milk (4.9% Fat, 3.7% Protein). Embryos from Sweet Dally and her daughters have been sold in more than 6 countries. Sweet Dally breeds elite progeny.

Two popular descendants of Sweet Dally:

- Brown Heaven B Sweet Dally, Ex-91-2E, was All-Canadian Summer Heifer in 2016, All-Canadian Honorable Mention Senior 3-year-old in 2018 and All-Canadian Honorable Mention 4-year-old in 2019, on top of having produced 45,780 kg of milk with 5% Fat and 3.7% Protein over 4 lactations.
- For Ferme Brown Heaven, Sweet Dally is an exceptional cow and a Brown Swiss Passion Cow. Over the years, she has distinguished herself both at the provincial and international levels, while producing over 95,000 kg of milk over 6 lactations.

Sweet Dally was nominated for All-Canadian Junior 2 Year Old, Junior 3 Year Old, and 5 Year Old.

For Ferme Brown Heaven, Sweet Dally is an exceptional cow and a Brown Swiss Passion Cow, since over the years she was able to distinguish herself, both at the provincial and international levels, while producing over 95,500 kg of milk in 6 lactations.

NEWS FROM ALBERTA

Hello Everyone, As I write this, it is cold outside and so I thought I can give everyone a chuckle with this little picture joke. I must have had that clipping for at least 25 years and I still love it.

Don't remember where I got it from, but it will stay in my very special "Joke Collection" till the day I die... I am sure all of you were hoping that "pandemic" would be a word of the past by now and you were looking forward to seeing everyone's smiles instead of masked faces. I am also sure that everyone is tired of being disguised like a bank robber when going grocery shopping; however, here we are still being very cautious and ever so thankful not to be sick. But undoubtedly, we all wish to be back to the "old normal", the question is, when will that be?

In Switzerland, we have an old saying that is "Patience brings Roses". In order to stay patient while waiting for the end of the pandemic, we took on a lot of projects this summer, which kept us really busy and that is the best way to be when waiting.

One of the projects was to turn down a piece of a very old field that has an abundance of rocks, including boulders that needed to be dug up. The accumulated heap of rocks is the size of a castle. Looking at it makes one wonder where all those "gems" were hiding and most of the credit for this monstrous rock pile goes to Ian, who relentlessly took on the job on a daily basis for a few hours. I helped, when I could, but I too had a few projects on the go that took time and effort and on top of all, we are searching for the right person(s) to transition our farm to. After 37 years, we wish to find someone with the same passion for the Original Braunvieh breed as we have.

This November, Farmfair took place again, after having been cancelled in 2020 due to Covid. The turn-out was small compared to before. The cattle took up one hall and a bit, compared to previous years of 2 ½ halls filled solid. Also, there was no Expo with it.

We were unsure at first whether or not we wanted to participate because of our busy schedule, but entered a couple of calves in order to support a new breeder who has a lot of enthusiasm to show. The Bonwick's (Kelly, Natalie and Travis) did great work representing the Original Braunvieh breed and took home some ribbons and prize money. Every morning early, Natalie was at the barns happy and eager, waiting for me, so we could bring in the cattle together. Also, Lori Anderson from Maranatha Braunvieh came up from Southern Alberta to help with the show. Natalie's and Lori's love for the Braunvieh is much appreciated. Thank you both for your participation. And a surprise happened at Farmfair for us. On the second last day, I said to Ian and Natalie "let's go to the Ag Business Center and have a visit with them". Turned out that a Mexican that we had known for years was there

"Cold hands."

to greet us and he pointed toward a big picture displayed behind him – what a surprise to see ourselves in that picture showing the bull calf "Felix" with his dam "Delux" in 2018.

So everyone insisted that we have our picture taken beside this picture and, guess what, Ian wore the exact same shirt and cap as three years ago. Lots of good laughs and teasing that it is time to go shopping for new stuff.

The ongoing drought conditions last summer caused feed shortages. Our hay crops yielded poorly, but we were able to buy additional hay from not too far away. Straw availability was another concern and we had to buy wheat rather than our favourite barley straw. It was a challenging year, but the main thing is, we are ready for winter. Wheat or barley, the cows will be comfortable.

On a positive note, interest in Braunvieh has been increasing with many inquiries resulting in sales. And now, with the New Year 2022 just having started, we hope that all of you will have Good Health and Happiness throughout. Take care.

Sincerely,

Verena Peden, Secretary-Manager
Alberta Braunvieh Association

NEWS FROM ONTARIO

Happy New Year to our fellow Brown Swiss breeders across Canada. We have come through another difficult year.

Ontario is looking forward to hosting the Annual General Meeting of the Canadian Brown Swiss and Braunvieh Association. The meeting will be held in Brantford on Friday, March 18 at Holstein Canada office in Brantford, with barn tours following on Saturday. We hope to see as many people as possible attending this meeting. Thank you to Shirley Dortmans for her work to arrange the meeting.

We held our Ontario Annual General Meeting this year on Saturday, November 27 at Sigview Farms, the home of Simon and Kristina Signer and their children Sawyer, Felicity, Celeste and Deacon. Our lunch and hot beverages were sponsored by Grand River Robotics and Molesworth Feed Company. We were able to see their robotic milking system.

We presented production awards to our top Ontario producers of 2020 – Congratulations!

SIGVIEW FARMS

Moorefield, Ontario

Our farm name is Sigview Farms with prefix SIGVIEW, our family farm owned by; Simon and Kristina Signer with help from their four young kids Sawyer (9), Felicity (7), Deacon (6), and Celeste (4).

We took over from Hans and Margreth Signer, prefix - Top Swiss in 2012. Hans switched the farm over from Guernsey to Brown Swiss when he bought the farm in 1981. They still own some of the cows in our herd and help out part time.

We enjoy working with the gentle and curious Brown Swiss cattle. We also appreciate their exceptional health traits. Along with our Brown Swiss we have a couple black and white Holsteins, one red and white Holstein, two Holstein cross and one beef cross. Our yearly herd production average is 305- M 10,400kg yearly bulk tank F-4.6% P-3.5%. We plan to continue breeding Brown Swiss for many years.

Our farm has been a member of the Canadian Brown Swiss and Braunvieh Association for 11 years and milk 50 to 60 cows in our newly built tunnel ventilated compost pack barn. We have one Lely robot; installed in 2020 for the milk cows. The old tie stall milk barn was converted to young stock pens. All young stock

are raised on pack pens and same for dry cows in the old barn. We currently run 215 acres of alfalfa, mixed hay, corn, soybeans and wheat.

When asked about our challenges and successes:

CHALLENGES being expensive land, quota availability and brown swiss semen availability

SUCCESSES are having dealers close by; all within 30 minutes for all aspects of the dairy farm (milk equipment, tractor dealers, etc). And support of Ontario Brown Swiss breeders.

Our objectives are to continue to breed strong, well balanced animals that will last for many lactations and produce well. Grow the herd to maximize the space in the new barn. We have been selecting mostly A2 bulls to hopefully get our herd producing all A2 milk. With a future vision to add a second robot so we can grow our herd size and develop a market for our own A2 milk or cheese or yogurt.

MARANATHA BRAUNVIEH HISTORY PT.1

Almost fifty years since the beginning in 1973

2-Part Series by Bruce and Lori

As a country kid coming after two farming grandfathers but having just completed my medical training, I yearned for the wide-open spaces. Fortuitously, in the summer 1972, Lori and I ended-up in the middle of nowhere in east central BC at the town of Clearwater, BC. At that time, it was a small logging town with 3 local mills, no hospital and 250 miles of highway between Kamloops, BC and Jasper, AB and definitely no permanent Doctor.

If that wasn't busy enough, we bought our first ranch property in 1973. My father, still back in Alberta, gifted us with two milking Brown Swiss grade cows. A second fortuitous event was the happenstance meeting with an academic agricultural geneticist whose father had just sold us an old worn-out tractor-attaching rototiller. The Ag fellow told us that one of the best prospective pools for a hybrid breeding program in cattle was the European Brown Swiss or Beef Brown Swiss that is now defined as "Original Braunvieh". The geneticist was well informed. We were to learn that two renowned hybrid breeds "BeefBooster" and "Hays Convertor" were developed in Alberta from the European Braunvieh and Brown Swiss cattle respectively.

Soon after, we began our search for individuals of this breed in Western Canada. There were some Brown Swiss dairy herds in the lower mainland of B.C. We headed to the coast and saw calves from the imported bull "Delfin" at Ladner, and the bull "Termin" (imported) at another dairy farm. We later saw "Ueli" (imported) at BCAl. Our first purchase was two purebred part "Braunvieh" heifers out of "Grober" (imported) from the disbursement of the American Brown Swiss herd at Ladner. We also bought some individuals from a dispersal at Cochrane. The wife of the owner, Len Fox, was dying of cancer. On visiting that farm, we saw American purebred Brown Swiss cows that were being

pasture bred by "Warren" (imported). Ken Copithorne of the "XC Bar Ranch" bought the best young stock and we bought cows and two "Jordan" heifers. Incidentally Ken Copithorne supplied the Braunvieh genetics for "BeefBooster".

In the fall of 1975, we headed to the Agribition in Regina. We found out there that the Beef Brown Swiss breed was called "Braunvieh"! We met some especially hospitable and enthusiastic breeders. These included Florian Eberl and George Ulrich (Starline Braunvieh) and others. We made our trip to Regina by CN passenger train that was still in existence across Canada. We returned home to Clearwater in the same manner. We were happy with the calves from Len Fox's Brown Swiss cows that were bred to Warren. Now we were in the market for a Beef Brown Swiss bull.

In the fall of 1977, we headed back to the Regina Agribition for the Braunvieh Show and Sale in of course November. The distance to Regina and over the Rogers Pass was almost 1500 km from Clearwater, BC. We took two "Warren" heifers born to the cows from Len Fox, whose herd we had shared with Ken Copithorne. We met Nick Diamont and his daughter, who were owners of Toreywood Farm, an influential breeder from Ontario. We personally never met other Ontario breeders of Original Braunvieh, including Kerr's of Kerholm. Toreywood had good cattle and must have come as far as 2600 km one way to bring their females.

MARANATHA BRAUNVIEH HISTORY

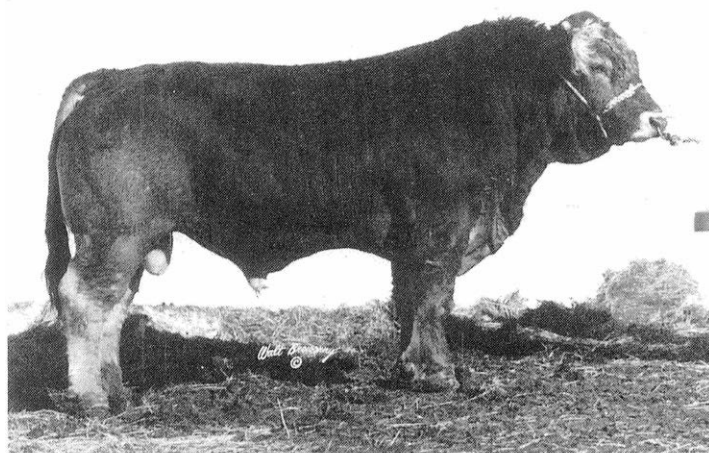

VISITOR. George Ulrich of Claresholm, Alta., and his father Hans, are seen at the Beef Brown Swiss sale at Agribition. The senior Ulrich was visiting from Switzerland.

Even Grandpa Hans Ulrich was at Agribition, in Saskatchewan. Hans Sr. was the prominent Swiss national that knew all the good herds in Europe and I believe would have been familiar with the breeders and the area around the stated birth place of the original Braunvieh at the Einsiedeln Monastery. We understand that Hans Ulrich Sr. (pictured) personally chose many of the European Dual-purpose Swiss Browns that were imported into Canada for a number of years following 1968. This was our first experience at showing cattle but we were eager students and happy that both of our heifers sold. Ken Copithorne bought one of them. It started to snow and blow from the north and by the time we were driving through Swift Current we were in the midst of the worst Prairie blizzard we had ever experienced. But we were "safe" in our one-ton 4X4 crew cab GM pickup with an empty stock trailer. Our only precious cargo were our two young sons, age 5 and 1.

While at the Agribition, we received an invitation from Florian and George to stop in Southern Alberta and look for a bull. They took us to see "Warren" who was seeing his last days and now looking fat and ready for market. It was sad to pass him up but our hearts were

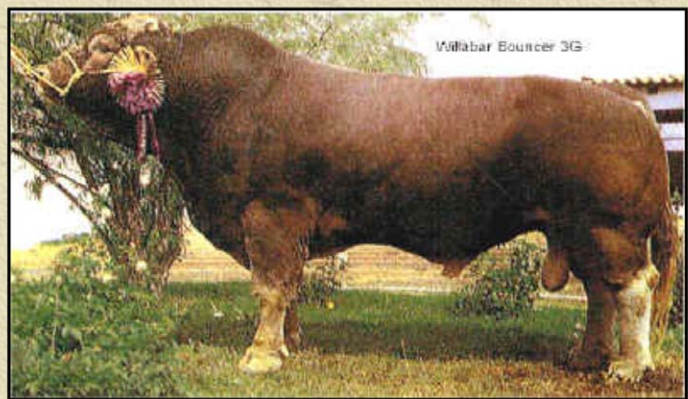

set on an 18-month-old bull that Florian was feeding. The young bull was from a small herd of Braunvieh owned by a local prominent Angus breeder, Orrin Hart of "Willabar". When my dad found out that we had a connection to Orrin Hart, he said with amazement – "I carried 5-year-old Orrin on a family outing to the spectacular viewpoint up on the "Porcupine Hills" in the extreme south of Alberta when I was first teaching school at Nanton AB in 1926 at the age of 16 years". My mother's father was a well-respected cattle buyer who did business with the well-respected Pat Burns and eminent A.E. Cross who was one of the "Big Four" who started the Calgary Stampede. I must have inherited some epigenetics from my Scottish grandfather because I had no on-the-ground training. I would not be dissuaded. I wanted to buy "Willabar Bouncer 3G".

Bouncer 3G

We compromised on the purchase - Florian and George bought a half interest and Lori and I bought the other half. Willabar Bouncer 3G became the worldwide celebrated and most Grand Champion-winning bull in Mexico.

Willabar Bouncer 3G

And so, after our purchase, "Bouncer" travelled the 800 km via the Rogers Pass yearly for two years both to and from Claresholm, AB to Clearwater, BC to pasture

MARANATHA BRAUNVIEH HISTORY

breed two herds. We collected semen on Bouncer after the second summer of pasture breeding. Then out of the blue, Vicente Oti from Mexico came looking for Braunvieh. Florian and George and ourselves had semen collected so we "froze" all sale of Bouncer semen collected in Canada and Bouncer went to Mexico. The worldwide impact of "Willabar Bouncer 3G" was initiated.

During our time at Clearwater, BC we purchased semen on bulls that had been imported into Canada. That was the start of the project to collect genetics on as much of the imported European Braunvieh as we could. In the summer of 1980, Lori and I did a short stint in a hospital in Kathmandu, Nepal. I think the surgical cases we did there prompted me to return to finish my surgical training that I had started in 1971. So, in 1981, we sold the farm and in 1982 headed back to Edmonton for an educational 2 years in Orthopedic Surgery. We had been blessed with two sons, Robert and Michael while we were in Clearwater. They reluctantly left our beautiful farm in the North Thompson Valley.

We were happy when the good earth called and we returned to BC in 1984. Through Florian Eberl we had sold the herd that we had established between 1973 and 1981 at Clearwater, BC. We had kept the frozen genetics that we had collected during that first sojourn. We bought a very productive piece of property at Enderby, BC in 1984 before moving back to BC and we started all over again. We bought some American Brown Swiss cows out of Saskatchewan and some embryos from Starline Braunvieh. With AI and embryo implantation, we developed a second herd. In February 1988, along with Eberls and George Ulrich, we entered some Braunvieh for the Show and Sale at Denver, Colorado. The weather turned bad with a blizzard in Montana but Andrew Eberl, along with some divine intervention, got all the animals to Denver safely. The Denver Show and Sale, in Colorado raised the exposure of Canadian Braunvieh further into the US. At the Denver sale, with my advice, "Starline Sullivan" was purchased by ABS (US) and we sold two heifers, one going to Mississippi and one to South Dakota.

Because of the politics of the medical world and after over 20 years of rural fulltime medical practice, my stress tolerance had waned. We bought more land next to our Enderby property but we were still 300 miles from the export market available in Alberta. We bought Magnus Perler's "Silverwood Dragon" during the last of the Enderby years. After we had collected semen and had his son "Maranatha Maxim" and other

excellent offspring, we had a chance to export Silverwood Dragon to the US to make a big impact there. He was eventually bought by the eminent A.W. Thorne Land and Cattle in Oklahoma, USA. They affectionately called him the "gentle giant". Thorne's second big production sale in 1998 featured "Silverwood Dragon" and the sale of his offspring. Presently online, the Thorne's are noting that "Dragon" sired the most herd sires compared to all the many other bulls they produced.

In the spring of our discontent, Maranatha Arthur 4Y arrived. He was a product from our cow, Maranatha Alpha, from a Starline embryo purchase and the bull "Ueli" (imported). This was our first breeding decision that showed our personal potential for the developmental improvement of the Canadian Braunvieh style. "Arthur 4Y" went worldwide through marketing by Starline Braunvieh. Most of our herd went to Texas, USA.

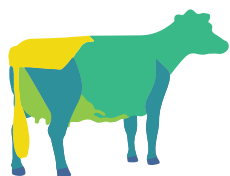

To be continued in next newsletter edition.

FUNCTIONAL CONFORMATION

WHAT DOES IT TAKE TO BUILD A LONG-LASTING COW?

Longevity in your herd has long been a goal for producers; in the most practical terms, the longer a cow lasts the more profitable she should technically be. To qualify this statement, however, we must add the adjective 'productive' in front, particularly now with the enormous amount of information we have on any cow. In the past, the selection was heavily based solely on production and conformation, mostly because functional traits were hard to measure and select. The production part was easier to quantify – the cow that produced the largest volume of milk was the best one. However, conformation brings some subjectivity to what is ideal, and largely, the ideal concept of conformation has seen large changes over the years. Combining that with ideal health and fertility traits we can begin to see the profit of productive longevity.

Looking at the conformation evolution of a few cows considered among the best in Canada at their time, it is clear the breed has been looking for more functional cows – cows of adequate width and openness, not extreme in stature, with a sound mammary system and easily mobile on her feet and legs. While our producers continue to look for more profitable animals, the breed committees continuously work to assure the industry needs are incorporated into the conformation evaluation – which also reflects into the bull proofs and national indices. Part of this work is analyzing which traits have the highest relationship with profitability and longevity, and weighting them accordingly into the conformation evaluations.

It is not only about the final score

It is not uncommon to hear about cows that did not score very high as young cows, but ended up producing very well for a long period – and these stories do stand out. However, these cows are outliers. Obviously, a good final score doesn't

necessarily translate into long-lasting and highly productive cows, but the females with an above average and balanced conformation through the parts are the ones with higher odds of lasting longer. And the positive consequence of a balanced conformation through the parts relates to an above average final score. Still, it is important to highlight that a strong breakdown across the board is an essential piece of the puzzle – so just selecting for health traits (and completely ignoring conformation) is not enough to guarantee profitability.

Where conformation and longevity tie-up

One can argue that type is not anymore the main breeding focus of a large selection of herds across the Country. Agreed. However, optimal conformation is a focus because every producer needs a herd that is founded in a very solid conformation base to sustain producing large amounts of milk for a long period of time in the current highly intense production systems. For that reason, every genetic selection index includes conformation traits in it, directly or indirectly. Completely ignoring conformation traits would mean a drastic reduction in productive longevity. Meanwhile, the classification system looks into incorporating the industry needs in a way the tool can aid in improving longevity.

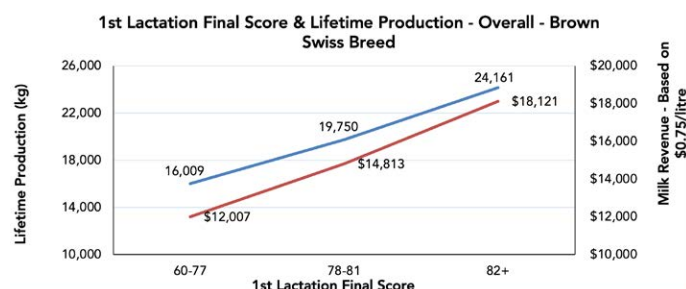

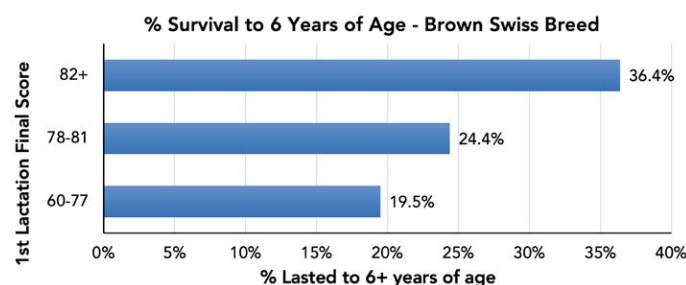

In Canada, the Durability component within the LPI formula is mostly affected by conformation traits, besides that of Herd Life. In the end, about 13% of the LPI value is directly affected by Mammary System and Feet and Legs, and indirectly through Herd Life, which had another 11% weight on the final LPI value. Similarly, Pro\$ is also affected by conformation traits, although in this case it is indirectly – meaning the conformation values are not weighted into the formula but still have their importance by composing other sub-indexes.

Functionality, longevity, and lifetime revenue

To find out how functional conformation was tied up to longevity, we tried to envision them on the farm level. For that, we got Holstein Canada's data from the first lactation first classification of over 2,500 Brown Swiss females born between 2011 and 2013,

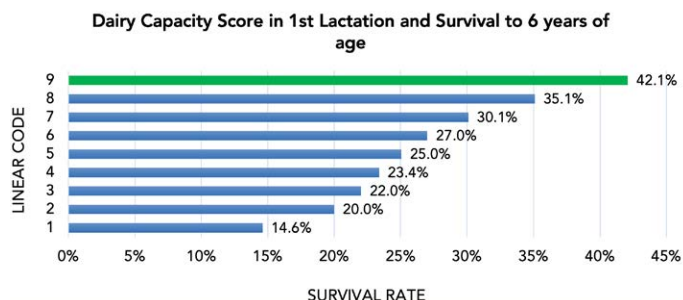

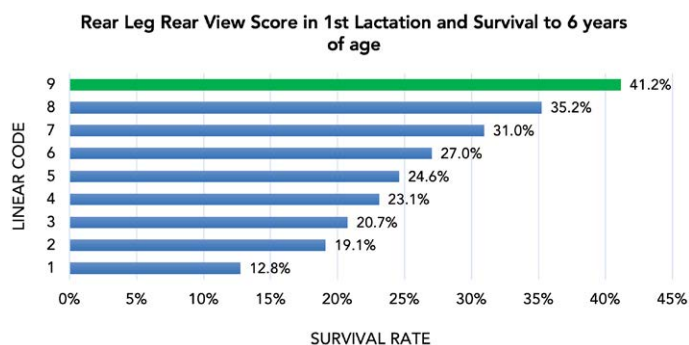

FUNCTIONAL CONFORMATION - WHAT DOES IT TAKE TO BUILD A LONG-LASTING COW?

and how many of these cows lasted to 6 years of age, how much they produced and generated income over their lifetime. The longevity trend is pretty clear: above average cows reached 6 years of age way more frequently than those that were average or below average. Even the difference between average to below-average cows was considerably noticeable. That translated into around 4,000kg lifetime milk produced between the groups and, most importantly, an increased revenue generated from milk sales favouring the better cows.

Breaking down the most relevant traits

Looking in more detail at the traits mostly related to longevity, the information from more than 300,000 Holstein cows supports understanding the focus on functionality and longevity in the classification system. Starting with Mammary System, the Brown Swiss scorecard has the most weight on Fore Attachment (FA) and Udder Texture (UT), which are two of the highly associated with survival to 6 years of age. On the graph, the ideal code is highlighted in green, Other Mammary System traits that also have strong relationship with longevity are long with Median Suspensory Ligament (MSL), Rear Attachment Height (RAH) and Rear Teat Placement (RTP). Meanwhile, deep udders are associated with drastically shorter longevity.

For Dairy Strength and Feet and Legs, Dairy

Capacity (DC) and Rear Leg Rear View (RLRV) can be highlighted with a strong relationship with longevity, as shown in the graphs. Both DC and RLRV have code 9 as ideal, and there is a clear advantage for animals with above-average conformation on these two traits. Interestingly, they are the highest weighted traits within Dairy Strength (25%) and Feet & Legs (26%) for Brown Swiss, respectively.

Functional conformation is the goal

Looking at the traits that score stronger have a higher association with longevity, it is not a coincidence that some of the highest weighted traits have a strong relationship with longevity. Again, it is not a matter of scoring the ideal (or highest score), but really a matter of functionality. An animal with traits scored very far from ideal is not functional for that characteristic, which comes with considerably lower chances of lasting long. For that reason, a perfect udder may not guarantee a profitable cow – poor legs would likely be a limiting factor. And this is where producers should focus – breeding for balance and functionality.

SWISS TRADITION

Braunvieh

Raising Original Braunvieh since 1984

This true dual purpose breed is hardy and excels in maternal traits, docility, performance and carcass quality. Swiss Tradition Braunvieh bulls have proven themselves in crossbreeding programs

Ian and Verena Peden

MESSAGE FROM REGISTRAR

Hello again,

As you know I have been working on the farm since May and I continue to enjoy getting my hands dirty. I would like to take the time to appreciate the work that all of you do every year to take care of your cows!

We have all battled with the weather this year to make sure the crops were planted and harvest. In Ontario, we had quite a dry beginning to our summer and then a very wet Fall which made the harvest difficult. Most recently, my heart goes out to all the farmers in British Columbia who have suffered from the terrible flooding and damage.

We made some updates on the website, listing top 3 animals for Milk kgs, Fat kgs and Protein kgs for the rolling year December 2020 to December 2021 and added Master Breeder Regulations. Check it out at – www.browncow.ca

Along with our board of directors we have been working hard on review of the by-laws. We have had a few meetings and will be presenting amendments to the membership at the Annual General Meeting (AGM) in March and if review is not completely done we will continue and bring forth any additional amendments to 2023 AGM.

Wishing you all a Happy, healthy and prosperous New Year!

Janine Eygenraam,
Registrar
