

Holstein Canada

Memo

Starting June 1, Holstein Canada will begin a phased approach for the resumption of Classification and proAction® Cattle Assessments. For the first month, we will be commencing these services in Ontario and Quebec, allowing our Classifiers and assessors to return to their homes without the need for hotel stays. There is no date yet for a return to the Eastern and Western regions but we continue to follow provincial and federal travel restrictions closely.

Regardless of the timeframe, producer and staff health is priority #1. This means that all Field staff will strictly follow enhanced biosecurity measures and regulations from the provincial and Federal governments as well as Dairy Farmers of Canada.

We will also not visit or penalize any producers who have expressed a hesitancy to have outside staff on their properties.

You can read our biosecurity protocols [here](#). To provide any feedback or ask questions about this return-to-farm plan, please email Brad Eggink @ BEggink@holstein.ca.
